

Chromolux quality is not a promise, but an experience confirmed by generations of users who keep coming back to it.

In a world of constant change, Chromolux remains a symbol of stability, security, and reliable results. Its long-standing presence on the market is no coincidence, but proof of the genuine value and justification these products deliver.

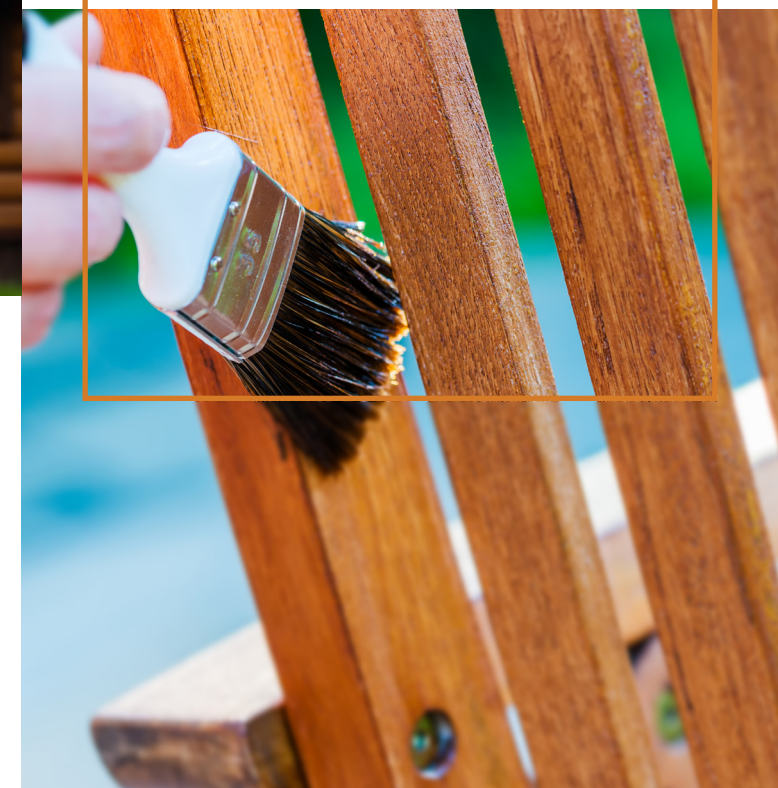

# Chromolux®

PRODUCTS FOR  
WOOD PROTECTION  
AND DECORATION

Chromolux has been providing wooden surfaces with long-lasting protection and distinctive beauty for decades.

With a wide range of products and systems, it ensures reliable protection of wood and wood-like materials – from transparent and covering coatings to decorative solutions. Chromolux enriches interior and exterior joinery and various wooden elements, emphasizing the natural beauty of wood and extending its lifespan.

## CHROMOLUX AQUA PUTTY FOR WOOD

Putty based on acrylic dispersion, fillers and pigments for filling unevenness and fine smoothing of wooden surfaces.

### Characteristics:

- Fine smoothing
- Easy application

**Packaging:** 0.75 kg

## CHROMOLUX PUTTY FOR WOOD

"Oil" putty based on oil-modified synthetic resin with the addition of fillers and pigments for smoothing of wood surfaces (joinery, various wooden objects, etc.).

### Characteristics:

- Fine smoothing
- Easy application

**Packaging:** 0.5 kg, 0.9 kg

## CHROMOLUX PRIMER

White, air-drying primer made on the basis of oil-modified alkyd resin with the addition of fillers and pigments. It is used as a base layer for the protection of joinery and other wood products.

### Characteristics:

- Good coverage
- Excellent sanding

**Packaging:** 0.75 l, 2.5 l

## CHROMOLUX PRIMER N

Colorless primers based on cellulose nitrate and alkyd resins in organic solvents. It is used for processing veneered and solid furniture.

### Characteristics:

- Forms a film that doesn't crack or decay
- Makes the wooden surface impermeable

**Packaging:** 0.75 l, 2.5 l

GREAT QUALITY

RELIABILITY

## CHROMOLUX BOAT LACQUER

Transparent, air-drying, glossy top coat based on a combination of alkyd and oil-modified polyurethane resins. It is used to protect wood from moisture (boats, exterior and interior joinery, wall cladding, etc.). It is used for the protection of new wood as well as for the restoration of surfaces treated with transparent alkyd stains i.e. stains of the same type.

### Characteristics:

- Exceptional moisture resistance
- High gloss

**Packaging:** 0.2 l, 0.75 l, 2.5 l

## CHROMOLUX N

Transparent nitro top coat for the protection and decoration of wooden and metal surfaces in interior spaces.

### Characteristics:

- Fast drying  
(2 hours between layers)

**Packaging:** 0.75 l, 2.5 l

## CHROMOLUX TON

Thin-layer stain for wood protection based on long-oil alkyd resin in organic solvents with the addition of light-fast pigments. It is used for the protection, decoration and refinement of interior and exterior joinery and other wood surfaces (fences, garden houses, external parts of the roof, etc.).

### Characteristics:

- Penetrates deep into the wood and protects it from the weather
- Enhances the natural texture of wood
- The protected surface is slightly matte
- Weather-resistant; It is particularly suitable for use at sea as it is resistant to rinsing with water
- Does not contain biocides

**Packaging:** 0.75 l, 2.5 l, 5 l

## CHROMOLUX TOP

Thick-layer stain for long-term wood protection based on alkyd resins in organic solvents with the addition of light-resistant pigments. It is used to protect external surfaces (windows, doors,...) and to protect interior wooden surfaces. It is particularly suitable for the protection of wood exposed to harsher weather conditions.

### Characteristics:

- Enhances the natural texture of wood
- The protected surface has a silky sheen
- Features excellent UV protection
- Weather-resistant; it is particularly suitable for use at sea as it is resistant to rinsing with water
- Does not contain biocides
- Water-repellent

**Packaging:** 0.75 l, 2.5 l, 5 l
